

Website UI/UX Ideas & Shopify Implementation Feasibility

1) Navigation Ideas

The navigation below displays the category and subcategory of all the segment

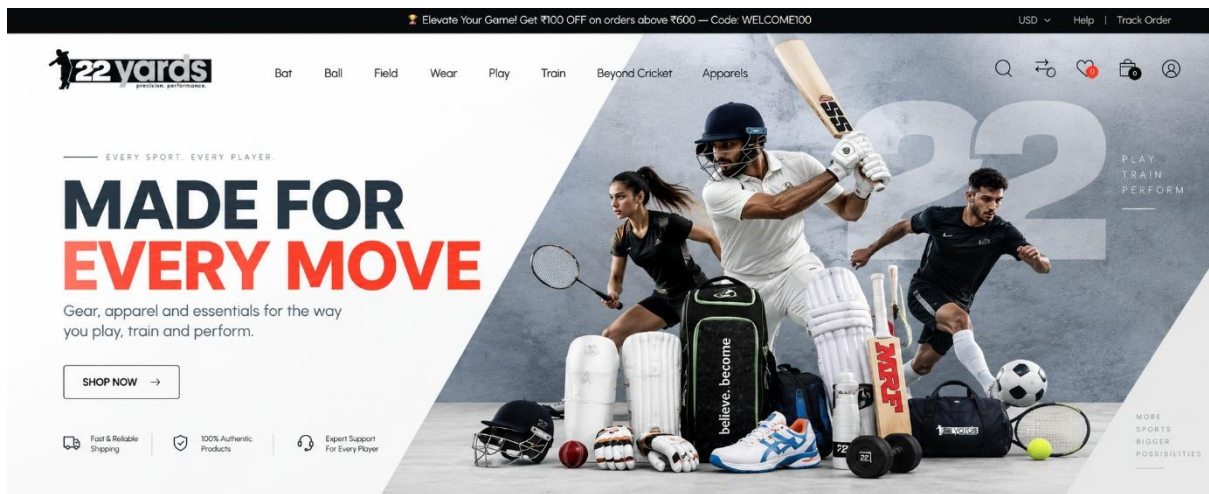

The below shows the expected display of subcategory of Specific category (Cricket) and subcategory:

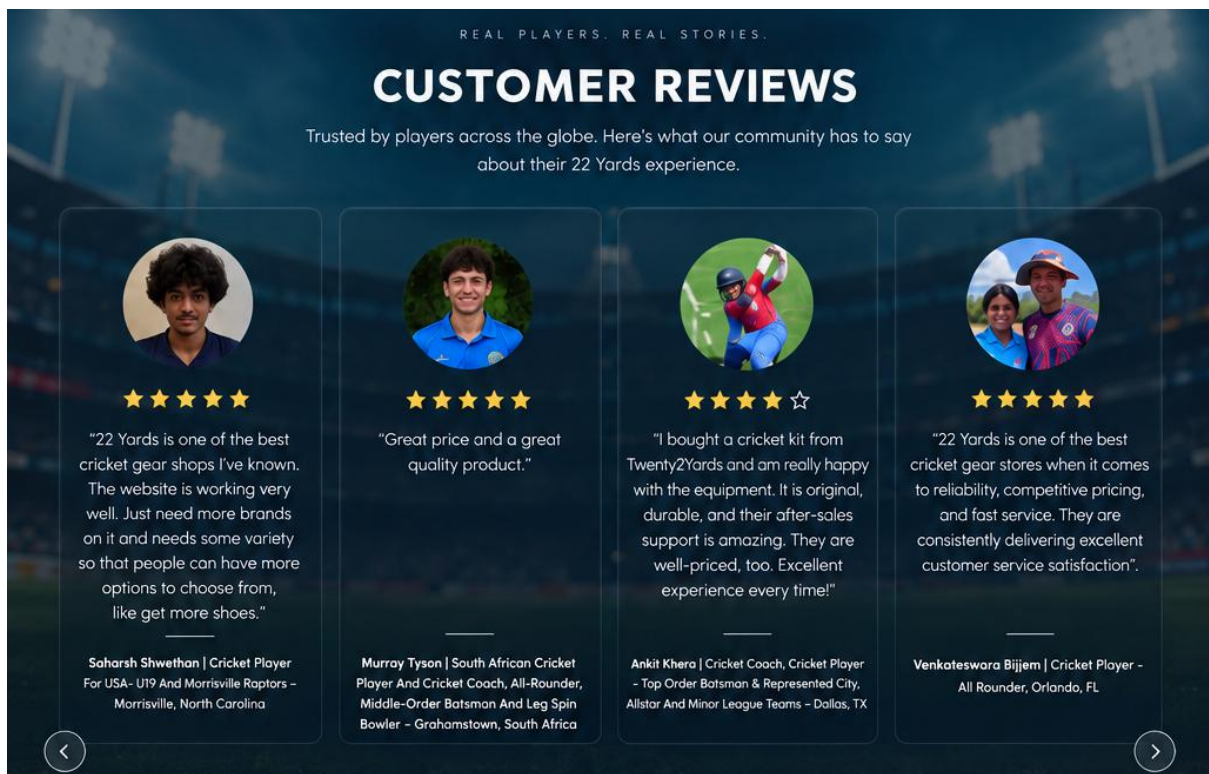

2)Banner

The banner should represent all sports rather than being cricket-focused. The colour shown is only an example; we can use colours from our existing brand palette for the final design.

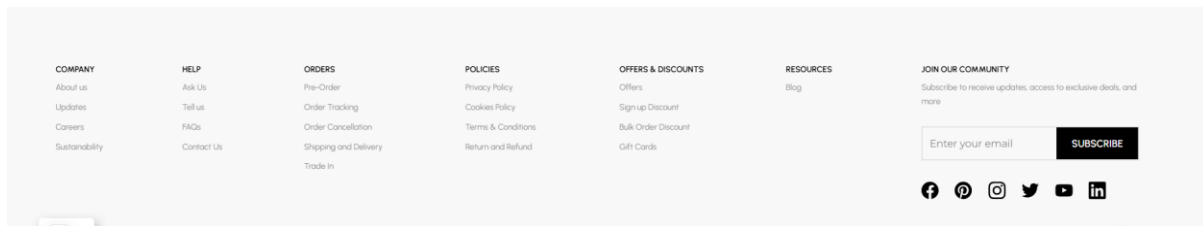

3)Customer Review

As mentioned in the website audit, I have consolidated the reviews into a single dedicated section for better visibility and impact.

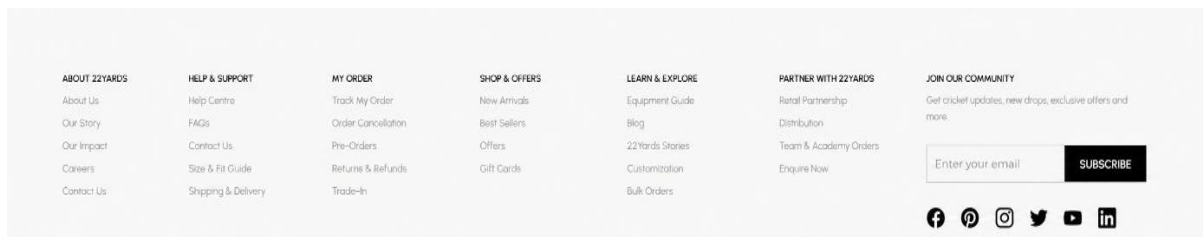

4)Website Footer

The current website footer:

The proposed website footer:

5)The logo clarity of the brands

Our current website displays the brand logos in grey, which makes them blend into the background and reduces their visibility. The attached example shows how using the original brand colours could make the section more visually appealing and help the brands stand out better.
